How to arrive by Metro

From various points of the city one can arrive by means of [the Metro subway system](#) to the Beauchef campus. The closest Metro stations to the Faculty are "Parque O'Higgins" and "Toesca" - both on line 2:

- Getting off at station Parque O'Higgins, exit and walk to the west in the direction of the large park. Cross the street towards the cement plaza with a ground-level fountain. There you will find the entrance to the park. You have to enter and cross the park in a diagonal direction (Northwest) until reaching "Tupper" street. From there, follow the sidewalk to the west until reaching Tupper 2007 where the Electrical Engineering building is located.
- From the Toesca station, which is a bit further in distance, find the exit in the western direction and walk a block down the street of the same name as the station to the street "Ejercito Libertador". Arriving at the intersection, turn left in the southern direction for three blocks until reaching Ave. Blanco Encalada. Once there, turn right and go one more block, reaching the intersection "Vergara" street. Cross Ave. Blanco Encalada to enter the Beauchef campus through the Geology building located in Plaza Ercilla 803; or by Ave. Blanco Encalada 2002, where the Civil Engineering and Geophysics building is located.
